

Images Download Guide for iOS

Instructions

1. Login to betastore.carloudy.com
2. Get your [AppId](#) with your app name
3. Upload your PNG images with names of two characters ([0-9](#), [a-z](#)) and all the characters MUST be LOWER CASE including file extension name
4. Pair the Carloudy with your iPhone app
5. Use provided SDK to send WiFi [SSID](#) and [password](#) to Carloudy and it will connect to WiFi. On Carloudy will show an icon after WiFi connected successfully.
6. Make sure your WiFi is connected successfully, and then send your [AppId](#) (start new session) using SDK to Carloudy.
7. Now Carloudy is downloading your uploaded images on betastore.carloudy.com. Please allow a few seconds to finish downloading images.
8. After that, send signals using SDK to show images and you will see the them shown on Carloudy.
